

Creación de tablas

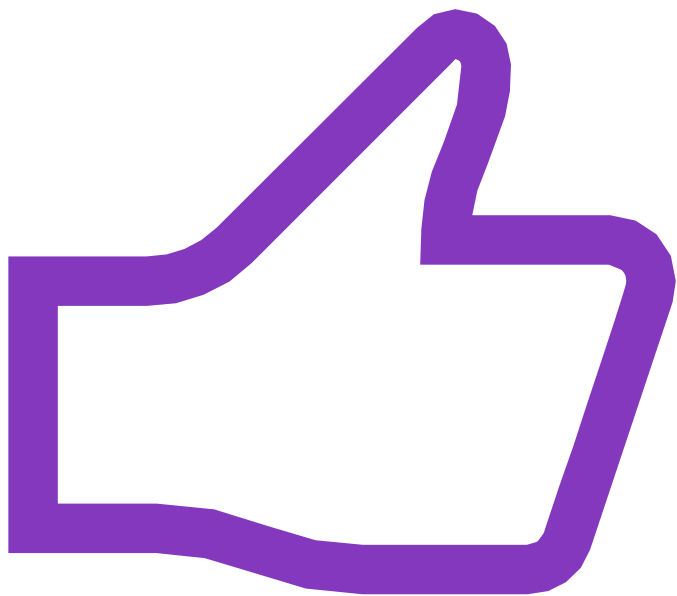

Autor: Tamara Herrera

Materia: Laboratorio IV

The background is a solid purple color. On the left side, there are several overlapping, semi-transparent geometric shapes in various shades of purple, creating a layered, abstract effect. These shapes include triangles and polygons of different sizes and orientations.

CSS Tables

[< Previous](#) [Next >](#)

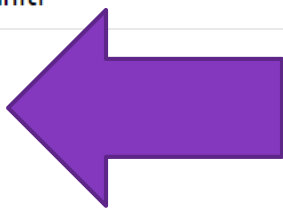

The look of an HTML table can be greatly improved with CSS:

Company	Contact	Country
Alfreds Futterkiste	Maria Anders	Germany
Berglunds snabbköp	Christina Berglund	Sweden
Centro comercial Moctezuma	Francisco Chang	Mexico
Ernst Handel	Roland Mendel	Austria
Island Trading	Helen Bennett	UK
Königlich Essen	Philip Cramer	Germany
Laughing Bacchus Winecellars	Yoshi Tannamuri	Canada
Magazzini Alimentari Riuniti	Giovanni Rovelli	Italy

Striped Table

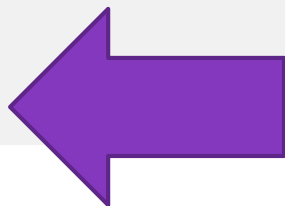

The **w3-striped** class is used to add zebra-stripes to a table:

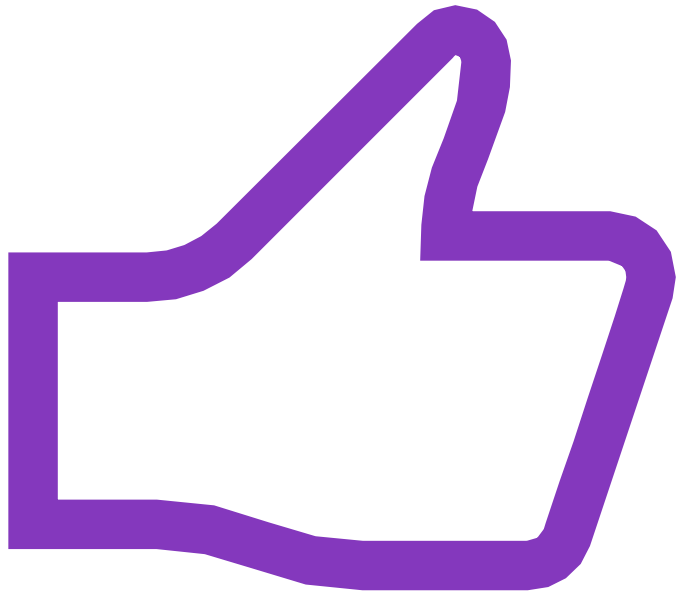

First Name	Last Name	Points
Jill	Smith	50
Eve	Jackson	94
Adam	Johnson	67

Example

```
<table class="w3-table w3-striped">
```

Página <https://getbootstrap.com>

Entrar a la página oficial de Bootstrap -> Click en get started

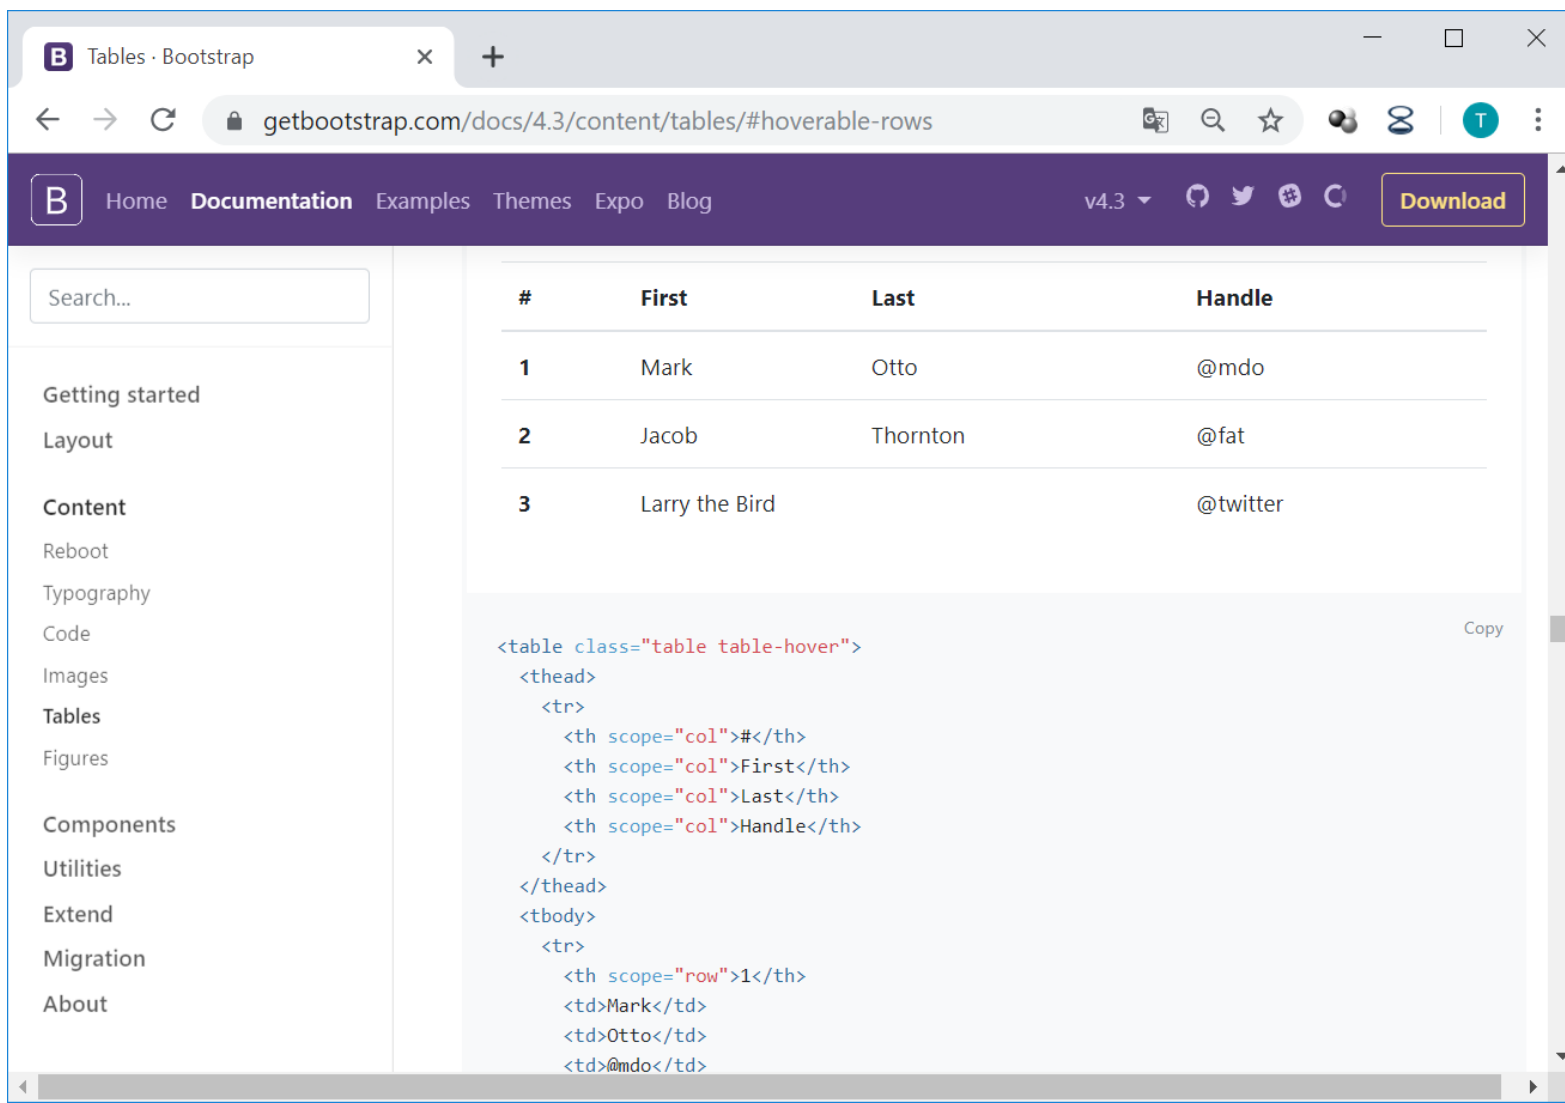

-> Buscar tables -> Click en tables/tables

A screenshot of the Bootstrap documentation website. The browser's address bar shows the URL 'getbootstrap.com/docs/4.3/getting-started/introduction/'. The website's navigation bar includes links for 'Home', 'Documentation', 'Examples', 'Themes', 'Expo', and 'Blog'. A search bar in the top left contains the text 'tables'. A dropdown menu is open, displaying search results under the heading 'Content'. The results list several links: 'Tables / Tables', 'Tables / Table head options', 'Tables / Bordered table', 'Tables / Borderless table', and 'Tables / Small table'. The first result, 'Tables / Tables', is highlighted. Below the search results, there are sections for 'Build tools', 'Webpack', 'Accessibility', and 'Lavout'. The main content area of the page shows the 'Introduction' section, which mentions that Bootstrap is the world's most popular framework for building mobile-first sites. A 'Quick start' section is also visible at the bottom of the page.

The screenshot shows the Bootstrap 4.3 documentation page for tables. The page has a dark purple header with the Bootstrap logo and navigation links: Home, Documentation, Examples, Themes, Expo, and Blog. The version is v4.3, and there is a Download button. A search bar is on the left. The main content area displays a table with hoverable rows. The table has four columns: #, First, Last, and Handle. The rows are numbered 1 to 3. Below the table, the HTML code for the table is shown, using the `table class="table table-hover"` and `th scope="col"` and `th scope="row"` attributes. A large purple arrow points to the right side of the table, indicating the hoverable rows feature.

Página www.datatables.net

The screenshot shows the DataTables website with a blue header and a white content area. The header contains the text "Add advanced interaction controls to your HTML tables *the free & easy way*". Below the header, there are two main sections: "1 - Include these two files" and "2 - Call this single function".

1 - Include these two files

- CSS** `//cdn.datatables.net/1.10.20/css/`
- JS** `//cdn.datatables.net/1.10.20/js/j`

2 - Call this single function

```
1 $(document).ready( function (
2   $('#myTable').DataTable()
3 } );
```

Below the instructions, there is a sample table with the following data:

Name	Position	Office
Airi Satou	Accountant	Tokyo
Angelica Ramos	Chief Executive Officer (CEO)	London
Ashton Cox	Junior Technical Author	San Francisco
Bradley Greer	Software Engineer	London
Brenden Wagner	Software Engineer	San Francisco
Brielle Williamson	Integration Specialist	New York

Agregar las librerías en el encabezado del jsp, dentro de la etiqueta head

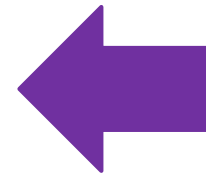

```
><head>  
<meta http-equiv="Content-Type" content="text/html; charset=ISO-8859-1">  
<title>Insert title here</title>
```

```
<link rel="stylesheet" type="text/css" href="https://cdn.datatables.net/1.10.19/css/jquery.dataTables.css">  
<script src="https://ajax.googleapis.com/ajax/libs/jquery/2.1.4/jquery.min.js"></script>  
<script type="text/javascript" charset="utf8" src="https://cdn.datatables.net/1.10.19/js/jquery.dataTables.js"></script>
```

Dibujar la table en el body, en este caso nuestra table se llama table_id

```
<table id="table_id" class="display">
  <thead>
    <tr>
      <th>Column 1</th>
      <th>Column 2</th>
    </tr>
  </thead>
  <tbody>
    <tr>
      <td>Row 1 Data 1</td>
      <td>Row 1 Data 2</td>
    </tr>
    <tr>
      <td>Row 2 Data 1</td>
      <td>Row 2 Data 2</td>
    </tr>
  </tbody>
</table>
```

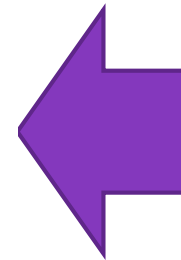

Por último en el head, colocamos el siguiente código javascript, observar que lo vinculamos a la tabla que se llama table_id

```
<head>
<meta http-equiv="Content-Type" content="text/html; charset=ISO
<title>Insert title here</title>

<link rel="stylesheet" type="text/css" href="https://cdn.datatables.net/1.10.16/css/jquery.dataTables.min.css">
<script src="https://ajax.googleapis.com/ajax/libs/jquery/2.1.4/jquery.min.js">
<script type="text/javascript" charset="utf8" src="https://cdn.datatables.net/1.10.16/js/jquery.dataTables.min.js">
```

```
<script type="text/javascript">
  $(document).ready( function () {
    $('#table_id').DataTable();
  } );
</script>
```

Con estos pasamos convertimos esta
